

POP3 Setup

- Click on the round **Home** button.
- Click on the **Settings** icon.
- Click **Mail, Contacts, Calendars**.
- Click **Add Account...**
- Choose **Other**
- Click **Add Mail Account**
- Enter your name, email address, password and a description of the account.
- Click **Next**.
- Select "POP" as the account type.

Incoming mail server (POP3):

- Host Name: **cmail.lv14.com**
- User Name: **Enter your full email address.**
- Password: **Enter your email address password.**

Outgoing mail server (SMTP):

- Host Name: **cmail.lv14.com**
- User Name: **Enter your full email address.**
- Password: **Enter your email address password..**

Click **Save**.

NOTE: During peak hours, you may experience some delay in verifying your iPhone email settings. If, after a few minutes, an alert box pops up with the message "Cannot Connect Using SSL, Do you want to try setting up the account without SSL?", Click "Yes". There may be another delay of a few minutes, and then the same alert box will pop up. Click "Yes" again and your settings should be verified.

After saving, click on the POP3 account you just created.
Scroll down and click **Advanced**.
Make sure **Authentication** is set to "Password".

IMAP Setup

- Click on the round **Home** button.
- Click on the **Settings** icon.
- Click **Mail, Contacts, Calendars**.
- Click **Add Account...**
- Choose **Other**
- Click **Add Mail Account**
- Enter your name, email address, password and a description of the account.
- Click **Next**.
- Select "IMAP" as the account type.

Incoming mail server (IMAP):

- Host Name: **cmail.lvl4.com**
- User Name: **Enter your full email address.**
- Password: **Enter your email address password...**

Outgoing mail server (SMTP):

- Host Name: **cmail.lvl4.com**
- User Name: **Enter your full email address.**
- Password: **Enter your email address password..**

Click **Save**.

NOTE: During peak hours, you may experience some delay in verifying your iPhone email settings. If, after a few minutes, an alert box pops up with the message "Cannot Connect Using SSL, Do you want to try setting up the account without SSL?", Click "Yes". There may be another delay of a few minutes, and then the same alert box will pop up. Click "Yes" again and your settings should be verified.

Click **Save**.

Click on the email account you just created.

On the next screen, click the IMAP account you just created.

Scroll down and click **Advanced**.

Under **Incoming Settings**, make sure **Authentication** is set to "Password".
